

# Power Supplies and Controller Product Overview

# Aluminium Surface Treatment

torstenahlers.com | 04/2016 | DD

## DC Power Supplies

- High current rectifiers
- Pulse plating rectifiers
- Polarity inverter
- Plating rectifiers
- Custom-made power supplies
- Controller
- Rectifiers for laboratory applications
- Multi-output power supplies
- Accessories

### AS 1200 / HS 1200 Anodizing Process Controllers

- Increased productivity and improvements in quality are the essential advantages of **AS 1200 / HS 1200** controllers compared to standard remote controllers.

### DCAC 1200

- Dedicated power supply and control system for electrolytic coloring processes.

### ALU-SPECTRAL®

- Power supply system designed for creating interference coloring effects.

# Power Supplies for Surface Finishing

Output range 0-9 00 V and 0-100,000 A

## The Powerful Solution ...

### Water-Cooled

■ Thyristor or switch mode (IGBT) power supply control

■ omega XL 2.0

■ PowerRack

■ PowerCabinet

## The Versatile Solution ...

### Air-Cooled

■ Thyristor or switch mode (IGBT) power supply control

■ PowerRack

■ psp compact

■ PSP Tower

■ psp bench cases alpha and gamma

## The Enduring Solution ...

### Oil and Oil / Water-Cooled

■ Thyristor or variable ratio transformer control

■ AxD  
Reverse pulse plating power supplies

■ MFD 10  
Process controller

■ PKA 2  
Stainless steel passivation for electroless nickel plating tanks
